

# Get the training and prediction keys

## Note

If you're using a Cognitive Services all-in-one key to access Custom Vision, then you'll only see one key on the settings screen. In this case, you'll use the same key for both training and prediction operations.

Or, you can obtain these keys and ID from the [Azure portal](#) by viewing your Custom Vision Training and Prediction resources and navigating to the **Keys** tab. There you'll find your training key and prediction key. Navigate to the **Properties** tab of your Prediction resource to get your prediction resource ID.
